

The Next Generation RealSims, LLC

Modular, Field Deployable Simulators And Training Devices

Flight Trainers *FTD's & AFTD's*
Vehicle Simulators *Display Systems*
Flight Controls *Manufacturing*
Rotary/Fixed Wing Cockpits *Integration & Consulting*

The RealSims FasTrac Bell 206 Jet Ranger - is a realistic replication of the actual Jet Ranger aircraft. The turnkey simulator includes a high quality fiberglass cockpit enclosure with a GEL COAT finish for durability. The enclosure comes standard in STEALTH BLACK, additional colors and custom paint schemes are available upon request. Cockpit consoles are fabricated using 1/4" aluminum for strength and durability. The standard simulator configuration includes:

Front Instrument Console - populated with operational primary analog gauges, and non functional switches. Switch and buttons can be wired for operation as required (option).

Center Instrument Console - populated with operational NAV COM Radio, ADF, DME and AUDIO PANEL.

Pilot Side Flight Controls- Mid to High Fidelity aircraft flight control package (Collective, Cyclic and Anti Torque Pedals). Co Pilot controls can be added optionally.

FasTrac Platform Optimization Deck (POD) - PODS are the foundation platform base used to support the cockpit. The standard configuration

includes (1) Pentium IV PC (rack mounted in the POD) to drive the sim software, primary gauges, flight controls and (1) OTW graphic channel. Several display options are available, from front and rear projection systems to hemispherical dome and multi channel PC Image Generators to drive fully immersive display systems with/without chin bubble views. The standard Bell 206 Jet Ranger simulator comes standard with MicroSoft Flight Simulator 2004 which contains most of the worlds major airport databases. Custom databases are also available optionally for military or commercial use. An Operator Instructor Station and optional in cockpit FLIR or CAMERA displays can be added if required.

For additional information, to ORDER or RENT this product visit <http://www.HeloSims.com> . Follow the link for COMMERCIAL SIMULATORS from the home page. Don't forget to check out other products and Display System solutions to compliment this system. This simulator can be installed into one of our MOTOR COACHES as a FIELD DEPLOYABLE rotary wing trainer. Our Motor Coach is a fully self contained MOBILE training facility complete with crew living quarters to accommodate up to six people. Bring the simulator to your aircrews and students and save on travel. This unit is also available for RENTAL. Bring it to your trade show booth or event, offer VIRTUAL helicopter tours to attendees and draw attendees to your booth.
