Mobile Solutions
Field Deployable Simulators & Trainers

INTRODUCING FASTRAC MOBILE TRAINING SOLUTIONS - To compliment our existing line of FasTrac Re-configurable Simulators™, RealSims is proud to announce the industries first totally Modular, Field Deployable Mobile Simulator. Our FasTrac line of mobile solutions include towable units available in 18 to 24' sizes to a fully self contained Motor Coach with all the comforts of a State-of Art training facility (depicted below). These rugged transportable units were designed to bring the flight training to the student in field and are ideally suited for both large and small Aircraft Manufacturers and Operators, Police Search & Rescue Departments, Department of Homeland Security, Border Patrol, and Certified Flight Instructors interested in establishing a mobile training business.

Simulators and training devices can be affordably configured to meet the specific needs of the customer at any fidelity. Mobile vehicles can be configured as low cost fixed or rotary wing procedures trainers for commercial IFR and turbine transition

training, to in theater military applications configured to emulate attack helicopters or fast jets for use as a field deployed mission rehearsal trainer for collaborative virtual training of Airborne and Ship/Ground based forces.

The Motor Coach is fully self contained and includes a large simulator bay in the rear of the vehicle with abundant space for an office or living quarters in the front. The vehicle has an expanding side wall to increase the usable space of the office/living quarters. The unit can be configured with a 7KW diesel generator for self contained power, AC and heat. RealSims can configure the simulator for just about any type of rotary or fixed wing aircraft complete with a single or multi channel display system. Flexible leases are available to qualified buyers. If you are an investor or a Certified Flight Instructor (CFI) interested in a ground floor opportunity give us a call we'd like to tell you about the benefits of joining our team and becoming involved in the NEXT GENERATION of simulation & training solutions from RealSims, LLC.
